

**AMENDMENTS TO THE SPECIFICATION****Page 3, Line 31 to Page 4, Line 2**

A U-shaped guide bar ~~[[33]]~~ 34 is mounted on the upper side of the frame toward the rear of the crumpling head. This bar has a pair of side arms ~~[[34, 34]]~~ 35, 35 which extend in a direction generally perpendicular to the path of the paper and form a second throat section with an opening 36 of lesser lateral extent than the first. As the paper is drawn through this opening, the central portion of it is gathered or pleated, and the outer portions are gathered even further, as illustrated in Figure 6. In the embodiment illustrated, the crumpling head is tilted back at an angle of about 45 degrees, and guide arms ~~[[34, 34]]~~ 35, 35 extend upwardly at a similar angle.
